

FIG. 1 is a diagram of a network architecture showing a central stack of seven layers (120-180) connected to a Server and a Client. The layers are: Layer 7 -- Application Layer (180), Layer 6 -- Presentation Layer (170), Layer 5 -- Session Layer (160), Layer 4 -- Transport Layer (150), Layer 3 -- Network Layer (140), Layer 2 -- Data Link Layer (130), and Layer 1 -- Physical Layer (120). The Server and Client are connected to the stack via lightning bolts, indicating network connectivity.
